

Ministry Position Summary

Ossian Campus Pastor & Hope Church Care Pastor

Focus/Purpose of this Ministry: This full-time pastoral role carries a dual-focus portfolio: serving as the primary leader, shepherd, and cultural guardian of the Ossian Campus, while simultaneously architecting, overseeing, and leading the centralized pastoral care, shepherding, and counseling systems for the entire Hope Missionary Church body across all locations.

Core Ministry Responsibilities:

1. Hope Church Care Systems Leadership (Church-Wide / Centralized)

Design & oversee a comprehensive, church-wide Pastoral Care system that tracks, supports, and serves the entire multi-campus church body. This system will standardize how the church tracks and responds to hospitalizations, acute family crises, prayer requests, and benevolence needs across all locations.

2. Local Campus Leadership (Ossian Campus)

Direct, schedule, and oversee the day-to-day efforts of the local part-time staff (Ossian Worship Leader and part-time Ossian Children's Ministry Director). Prepare and deliver the message in the worship services occasionally as scheduled and directed by the Lead Pastor. Serve as the visible face and missional representative of Hope Missionary Church within Ossian.

3. Leadership Multiplication & Discipleship Partnership

Partner closely with the central Director of Connections to ensure excellent property logistics (parking, greeters, coffee teams) at the Ossian Campus. Partner with the central Pastor of Discipleship to provide direct coaching, spiritual encouragement, and leadership training for all Ossian-based small group and adult class leaders.

4. Operational Stewardship

Ensure wise management of the specific portion of the Hope Church budget designated for ministries under his direct oversight. Complete other tasks, special multi-site logistical projects, and strategic duties as assigned by the executive supervisor.
